

Configuration:

LS-04-072-01 Advanced Installed RF System
(216 MHz) (North America)

Product Overview:

The Advanced Installed System includes the LR-500 programmable receivers, a charging case, and rechargeable batteries to add functionality and value to your system. The LR-500 receiver can be programmed to receive only the channels you are using. You can also substitute any accessories to better meet your needs, such as substituting a rack mount kit, antenna, or additional receivers. Use this system for auditory assistance, in-ear cueing, board and training meetings, and overflow areas. Great for outdoor events, corporations, theaters, and houses of worship.

Highlights:

- Perfect for where your guest changes the channel to find the audio source
- Superior Audio Quality - 80 dB signal-to-noise ratio, setting the industry's sound quality standard
- A choice between 57 channels - ideal for a wide range of applications
- Long transmission range ensures coverage for the entire venue
- Programmability - Unneeded channels can be locked so this receiver will access only one or more channels of your choice
- 100% Digital - Listen receivers are digitally-tuned so transmission won't drift
- Uses standard alkaline or NiMH batteries
- Built in SmartCharge™ won't allow batteries to over charge
- Limited Lifetime Warranty with hassle-free support
